

## ▶ RUN Inventory Management System

Today's tough economic conditions, characterized by increased competition, short product life cycles, increased outsourcing, and increased demand uncertainty, make it more challenging to manage your inventory.

**RUN** Inventory Management is a flexible, comprehensive system that enables you to increase your inventory accuracy and customer service levels and, at the same time, reduce your carrying costs, labor costs, and inventory write-offs.

**RUN** Inventory helps you make faster, more accurate decisions, which is critical in today's complex global inventory environments.

### ▶ BENEFITS

- Design flexible put-away plans, track the physical location and transfer of items, and maintain lot and serial controls for simplified material logistics.
- Gain real-time visibility into your inventory to guide swift and accurate decision-making.
- Determine your most profitable channels, products, and customers.
- Create flexible controls and inventory tracking systems that reflect the unique way you do business-today and in the future.
- Increase labor productivity and inventory accuracy.
- Simplify third-party label formatting and printing by creating label-specific flat files of your bar code data.
- Print bar codes on standard reports for easy reference . enter and maintain costing information quickly and easily, and use that information to calculate appropriate valuations easily.
- Demand variability occurs due to seasonal factors.
- Lower premium freight costs (expediting).
- Reduced administrative costs.
- **It can help you to improve customer service through:**
  - ▶ Reduced risk of stock outs
  - ▶ Lower risk of production delays
  - ▶ Increased accuracy in production and delivery dates
- **In addition, it can help increasing velocity and responsiveness through:**
  - ▶ Enhanced capacity utilization
  - ▶ The increased speed and accuracy of automated processes
  - ▶ The sharing of real-time inventory information
- Create customized accounting templates to minimize data entry and streamline how each user performs his tasks.
- Manage your units of measurement through unit of measurement management system.
- **Count your items flexibly by two ways:**
  - ▶ Cycle count
  - ▶ Physical count
- Analyze your items by many criteria by ABC analysis system
- Report scheduling system.
